MACHINE SINKS UNDERWATER SHAFTS -- Moscow, Pravda, 12 Aug 52

The Zaporozh'ye Dneprovskiy Machinery Plant has turned out a great many tools for the builders of the South Ukrainian and North Crimean canals, several concrete plants for the Dneprostroy Administration [which is building the Kakhovka GES], and hundreds of metal towers for the Krivoy-Rog-Kakhovka power line. All these orders were filled ahead of schedule.

Recently the plant completed a new machine, the first of its kind, intended for drilling underwater shafts. Designed by Giprosnakht, (Ukrainian State Institute for Planning Mine Construction in the Coal Industry), the aggregate can operate at great depths, cutting mine shafts 1,300 millimeters in diameter.

The machine has already been operating for several days in the Dnepr River at the site of the Kakhovka GES, and is performing satisfactorily.

The Dneprostroy Administration has ordered a second such underwater drilling aggregate from the plant.

PLEDGE ABOVE-PLAN PRODUCTION -- Kishinev, Sovetskaya Moldaviya, 26 Aug 52

The Kishinev Machinery Plant imeni Kotovskiy met the 1952 half-year plan ahead of schedule, maintaining its lead in the socialist competition among Kishinev industrial enterprises.

The plant has pledged to achieve the following goals during 1952: to meet the year plan for gross and commodity production by 1 December; to produce above the September plan 15 tool-grinding machines, two MP-3,000 pumps, one KMG-2 rock-cutting machine, one MP-75 hammer, and one ball mill; to produce by 5 October 200,000 rubles' worth of above-plan equipment, including six MP-75 hammers, three MP-800 ball mills, 29 tool-grinding machines, one KMG-2 rock-cutting machine, one PK-800 ceramics press, and two MP-3,000 pumps; and to establish production of ZM-634 grinding and polishing machines and NP-4,000 cylinder pumps by the end of 1952.

CONTRIBUTE DRILLING TOOLS -- Moscow, Izvestiya, 4 Jun 52

The Alma-Ata Heavy Machine-Building Plant, which turns out tools for heavy drilling units, has sent the great construction projects over 25 tons of tools since the first of the year.

TOOLS GO TO CONSTRUCTION PROJECTS -- Ashkhabad, Turkmenskaya Iskra, 6 Jul 52

The Lyudinovo Locomobile Plant has established production of drilling tools, and is shipping them to the great construction projects.

SEND CRUSHING UNITS -- Moscow, Trud, 9 Jul 52

The Vyksa Road and Crushing Equipment Plant has sent the builders of the Stalingrad GES two mobile crushing units, each with a productivity of 30 tons per hour. A similar stationary machine has been sent to the builders of the Main Turkmen Canal.
